PROFILE

I am a passionate developer with experience in both Front-end and Back-end development, specializing in HTML, CSS, JavaScript, Vue.js, Nuxt.js, and Laravel. I enjoy building responsive and interactive websites and have foundational knowledge of REST APIs and deployment tools like Dokku. With experience in Flutter and version control using Git/GitHub, I am eager to grow as a **Back-End Developer Intern**. I value teamwork, learning, and problem-solving and am excited to contribute to impactful projects.

EDUCATION

Bachelor Degree of Software Engineering

Cambodia Academy of Digital Technology (CADT)
Jan 2023 - Present

WORK EXPERIENCE

April Phnom Penh

JAN 2025 - PRESENT

Back-End and Front-End Developer

- Developed a backend function to calculate total revenue (male and female) and verify invoices.
- Implemented product CRUD operations, including adding, editing, activating, and deactivating products on the frontend.
- Designed and optimized the category selection page for better user experience.

Web Developer - School Project

MAY 2023 - JUNE 2023

Project Coordinator

- Managed tasks effectively and ensured smooth collaboration within the team.
- Designed and developed a responsive web application using PHP, MySQL, and Laravel.
- Implemented user authentication, database integration, and CRUD functionalities.
- Conducted testing and debugging to enhance performance and user experience.
- Coordinated with team members to deliver the project within the timeline.
